

☞ Scanf () statement.

- 1) Input two numbers and prints its Addition, Subtraction, Multiplication and Division.
- 2) Verify the formula of Simple Interest.
- 3) Input a Rupee and print its value converted into Dollar.
- 4) Input Meter and convert it into Inch, Foot and Centimeter.
- 5) Input a Number of Chairs and its Total Cost and Prints the Cost of Each chair.
- 6) Calculate the area of circle. ($2 * PI * r$)
- 7) Calculate the area of Triangle. ($Area = \frac{1}{2} * b * h$) where b=base h=vertical height

☞ If...Else statement:

- 8) Input a number & print the number is odd or even.
- 9) Input a number and print it is Negative, Positive or Zero.
- 10) Input 2 numbers and print the maximum among them.
- 11) Input 2 numbers and print the maximum among them. (Without If statement)
- 12) Input 2 numbers and print the minimum among them.
- 13) Input 2 numbers and print the minimum among them. (Without If statement)
- 14) Input 3 numbers and print the maximum among them.
- 15) Ask two values and print addition, subtraction, multiplication & division in one choice base program using if() statement.
- 16) Ask two values and print addition, subtraction, multiplication & division in one choice base program using switch() statement.
- 17) Get a character in lower case form user and display it in upper case.
- 18) Get a character from user and print that is it vowel or consonant.
- 19) Get a character from user and print that is it vowel or consonant. (Using Switch case)

☞ Looping structure (for, while, do...while)

- 20) Print 1 to 10.
- 21) Print 10 to 1
- 22) Print 20 to 1 Odd value
- 23) Print 20 to 1 Even value
- 24) Print 1,2,4,8,16,32,64,
- 25) Print the series 1,4,9,16,25,36,49,64,81,100
- 26) Print the series 1,8,27,64,125
- 27) Print 1,10,2,9,3,8,4,7,5,6,
- 28) Print 1,11,20,28,25,41,46,50,53,55,56,
- 29) Print the total of 1 to 10.
- 30) Print the calculation of $1-2+3-4+5-6+7-8+9$.
- 31) Print the total of first 20 even numbers.
- 32) Print the total of first 20 odd numbers.

- 33) Ask for the marks of 4 subjects and print total, percentage, grade and result.
- 34) Input the age of 5 students and print the number of students having age less than 18 and greater than or equal to 18.
- 35) Except one no from user and display Reverse if it.
- 36) Except one no from user and display sum of its digits.
- 37) Except one no from user and display its factorial.
- 38) Except one no from user and print it is prime or not.
- 39) Except one no. from user and print it is Armstrong number or not.
- 40) Print 0 1 1 2 3 5 8 13 21 34 55 ... (Fibonacci series)
- 41) Ask a value from user and print its length. (Ex. 2109, Output: 4)
- 42) Ask a value from user and print its sum. (Ex. 2109, Output: $2+1+0+9 = 12$)
- 43) Ask a value from user and print it in word. (Ex. 2109, Output: Two One Zero Nine)
- 44) Make a program for General knowledge test (similar to KBC).
